

Juan Pedro Aguayo

Full-stack developer

Located at Valencia (Spain)

Career summary:

Started in 1996 composing music for interactive CD-ROMS at a local small company and started to be interested on the whole development focusing on programming. From there, he evolved to web and mobile development working as freelance since 2016 when he started working at Prosodie-Capgémini as IOS developer although he is also developing and maintaining web projects. Currently working at ClickCode, an IT company located at Madrid.

His profile is that of a self-made man and autodidact.

Education:

First cycle music degree.
Autodidact as developer.

TAGS: Macromedia Director, Macromedia Flash, ActionScript, Cubase, sound editors.

SOME PROJECTS

Having developed hundred of web projects and a handful of mobile projects, many of them are not available because they are no longer published or they are private web applications that can not be accessed without breaking privacy rules. It could be that some mobile app does not work because it has not been updated because they are not maintained by the owners.

IOS
